Revolving Chairs

Auditorium Chair

Seat and back assembly: The seat and back are made of thick hot pressed plywood, upholstered with fabric and moulded Polyurethane foam. Permanent Contact

Mechanism: The chair is provided with a permanent contact mechanism back tilt tension can be adjusted to suit ones preference. **Powder Coating:** All metal components are epoxy polyester powder coated. **Armrests:** The one piece armrests are made of integral skin - polyurethane foam and reinforced in MS insert.

Will be made of pressed steel base which are ribbed with two counters sunk holes for floor fixing. This is so designed to give Maximum Support, Durability & Strength. The leg will contain a cavity to

receive the tubular. steel tubes all welded by continuous arc and suitably capped by polypropylene capping with groves specifically designed for this purpose. Long use spacers will be required to enhance the center to 505 or 510 such that symmetrical aisle requirements are met. All end legs will have large upholstered end panels fixed to the outer size of the standard. Panels will be 12mm plywood covered with fabrics.
